EXPERTISE

Based on more than 10 years of research, EVEON has developed a recognized **expertise in microfluidics** to solve preparation and delivery challenges. With more than 60% of the staff dedicated to **R&D and industrialisation**, we cover a complete range of skills in fluidics, mechanics, electronics, software and project management.

CUSTOM DEVICES

EVEON is interested in establishing a portfolio of strategic collaborations with key partners who wish to **co-develop** products using EVEON's key platform technologies. We welcome the opportunity to discuss areas of potential common interest from which to build value for both parties. EVEON addresses challenges to design and develop your devices according to **two broad approaches**.

Device based on **your specific needs**

Device based on **Intuity® proprietary technological platforms**

INTUITY® PLATFORMS

Intuity® Mix

Standardization of product
preparation prior to use

Intuity® Ject

Fully automatic and
controlled **injection**

Intuity® Spray

Controlled spray-mist
delivery
